

Dear Sir / Madam,

Here at Mellors, we're all about exploring tastes, fuelling your students learning, and discovering 'A World of Fun with Food!'

We all know that teaching children about eating healthy & nutritious food can sometimes feel like an uphill climb. What if you could turn that climb into a fun, rewarding (and delicious!) ride?!

Introducing the **Mellors Smoothie Bike** – a *wheely* exciting, interactive experience designed to get pupils moving whilst learning all about the importance of a healthy lifestyle.

Why bring the Mellors Smoothie Bike Experience to your school?

Our Smoothie Bikes offer a unique “pedal-powered” approach to wellness that resonates with children of all ages:

- **Active Learning:** Pupils use their own leg power to spin the blender, seeing a direct, physical result from their effort. It's the perfect way to pedal a healthy message!
- **Nutrition in Action:** Move beyond the textbook - Children engage with fresh ingredients firsthand, creating positive food relationships.
- **The Mind-Body Connection:** The activity provides a tangible demonstration of the link between physical exercise and refuelling the body.

READY, SET, BLEND!

- How our Smoothie Bike Works

We provide the bikes, the fresh ingredients, and the expertise. The pupils provide the pedal power, and everyone walks away having tasted their hard-earned smoothie, PLUS a better understanding of healthy living.

We would love to help you host a **Smoothie Bike Event** at your school. Whether it's a wellness assembly, Sports Day or as part of a reward, we guarantee it will be the talk of the playground.

SPEAK TO YOUR AREA MANAGER TODAY TO BOOK!

Put your pedal to the metal, and ask about the Mellors Smoothie Bike Experience today!
